Chairman's Message

Our modern world has witnessed a huge technological revolution that turned our vast planet into a mere small village and changed our way of life dramatically. In this major transformation, waves of products and services have become available.

In this environment of abundant choices, we have strived to get the best for our clients and attend to their needs and requirements. A special attention was given to after sales services. The result has been the satisfaction of our clients and their continuous support towards our business.

Since the beginning, local manufacturing of many of the products we had to import has featured high on our list of priorities. We are fortunate in realizing that goal to great extent. Today, our industrial facilities which cover over 60,000sqm. produce the majority of the products we trade in at quality levels that easily compete with similar imported goods.

Despite our accomplishments, we insist on relentlessly moving forward at full thrust in using the latest technology to improve and diversify our products. Needless to say, our ultimate objective is to maintain our distinguished position in the market and retain the confidence of our cherished customers.

Abdullah S. Al Dabaan

Ramah History

Ramah Aluminum Factory Company was established in 1978 in collaboration with a leading German manufacturer in Riyadh. The German know-how was vital in choosing the proper machinery and developing advanced systems of aluminum products that enabled the company to be a market leader. In 1985 it became a fully owned Saudi company and continued its growth.

Today, it manufactures a variety of high quality products ranging from structural glazing, curtain walls, cladding, doors, domes, rolling shutters, and accessories. In its continuous developments, Ramah has forged close links with specialized international firms and thus secured transfer of technology and licensing agreements. These efforts include cooperation with companies from Germany, France and Italy which produces ranges of high quality products. Ramah added a first class double glazing glass facility supplied by the Austrian Lisec company.

Ramah works closely with its sister company Riyadh Aluminum Products Company (RALCO), which has three major divisions:

- Trading in aluminum profiles and accessories
- Fabrication of steel doors and other steel products
- Fabrication of aluminum cladding

From the beginning Ramah has associated itself with many international partners in order to provide highly sophisticated products. It has entered in to technical collaboarations with the following leading companies:

TECHNAL	France	All types of units (Authorized Builder)
Wicona	Germany	Curtain Wall, Structural Glazing
Alcoa	Italy	Structural Glazing
CAODURO	Italy	Skylight
Reynobond	France	Aluminum Cladding Systems
Alutec	Italy	Customized Accessories

Ramah, looks back with great pride at its achievements in the past thirty two years. It has left its distinguished marks in many prestigious projects all over Saudi Arabia and the surrounding countries.

Al Rashed Projects

Description:

Client: RTCC

Building: Specialized Medical Center

Date: 1997-2009

Product/Area:

- Wicona structural glazing system 3000 sqm.
- Alcoa structural glazing system 3000 sqm.

Client: RTCC

Building: Al Rashed tower 2

Date: 2008 - 2009

Product/Area:

- RSG60 Ramah aluminum structural glazing system 6500 sqm.
- Ramah standard spider system with stainless steel support

Al Habib Hospitals

Description:

Client: AL-Habib hospitals (Qassim, Ob-gyne, Rayan, Surgery, Takasusi, Main Pharmacy, Dermatology)

Date: 2005 - present

Product/Area:

- RSG60 Ramah aluminum structural glazing system 18.000 sqm.
- RCL60 Ramah aluminum cladding system 20.000 sqm.

Granada Mall

Description:

Client: General Organization for Social Insurance

Date: 2003

Product/Area:

- Wicono curtain wall system with sunshade 3500 sqm.
- Special Ramah design for flower ceiling 7000 sqm.
- Ramah skylight system 1185 sqm.

Prince Sultan Humanitarian City

Description:

Client: Prince Sultan Bin Abdul-Aziz Al-Saud Foundation

Date: 1999 - 2000

Product/Area:

- Technal system (Curtain wall, semi-structural glazing, windows, doors, sun shades)

30.000 sqm.

Riyadh Exhibition

Description:

Client: Chamber of Commerce

Date: 2008 - 2009

Product/Area:

- RCW60 Ramah aluminum curtain wall with aluminum nose 7.000 sqm.
- RCL50 Reynobond aluminum cladding - France 20.000 sqm.

Civil Defense

Description:

Client: Civil Defense

Date: 2010

Product/Area:

- Alupco structural glazing system 6500 sqm.

NCB

Description:

Client: NCB

Date: 2007 - 2008

Product/Area:

- Technal curtain wall system 20000 sqm.
- Stainless steel spider system

Hotels

Description:

Client: Madareen Hotel

Date: 2009

Product/Area:

- RG70 Ramah windows system 1000 sqm.
- RSG60 Ramah aluminum structural glazing system 1000 sqm.

Client: Sheraton Hotel

Date: 2003

Product/Area:

- Technal Mecano system
- cladding 2000 sqm., glass 3000 sqm.

Client: Shebat Al Hamd Hotel

Date: 2006

Product/Area:

- Alcoa structural glazing system 1500 sqm.

Bait Projects

Description:

Client: Al Bait for development Co. (11, 12, 13, 19 ,52 , 56 bldg. no. & head quarters))

Date: 2005 - present

Product/Area:

- RSG60 Ramah aluminum structural glazing 16000 sqm.
- RSG50 Ramah aluminum cladding system 15500 sqm.

Ramah Team/Facility

Description:

- Ramah has over 300 employees that include professional managers, qualified engineers, specialized aluminum technicians.
- Our present production capacity exceeds 2,000 tons per year on a single shift basis.
- Ramah is a member of AAMA (Architectural Aluminum Manufacturers Association of America)
- Ramah uses the latest technology (Software and Hardware) to provide highly sophisticated products in the market.

Ramah Quality:

Ramah is awarded with ISO 9002 certificate. At every stage of fabrication, the work-in-process is checked and final products are thoroughly inspected before passing for dispatch. Strict quality control is enforced while materials are received as well as final installation. The products are tested in reputable laboratories both inside & outside the Kingdom as per DIN, BS, & ASTM standards.
